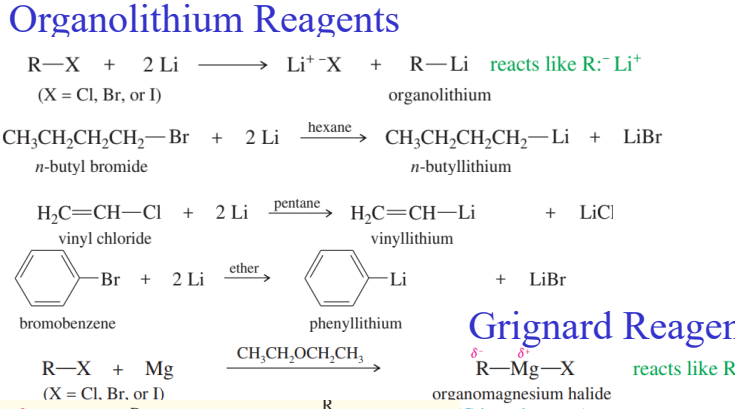
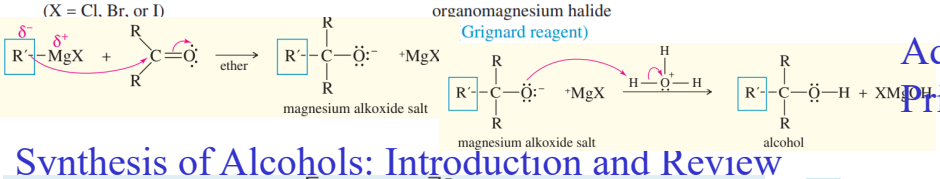
Acidity of Alcohols and Phenols

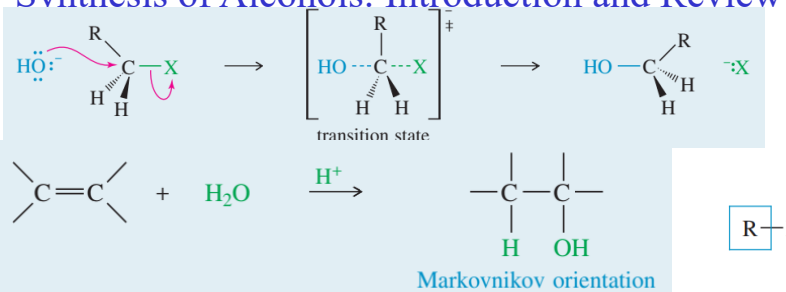
Organolithium Reagents

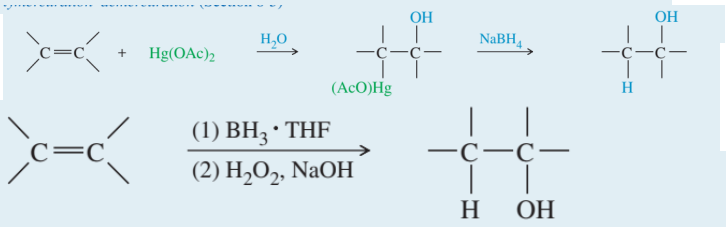


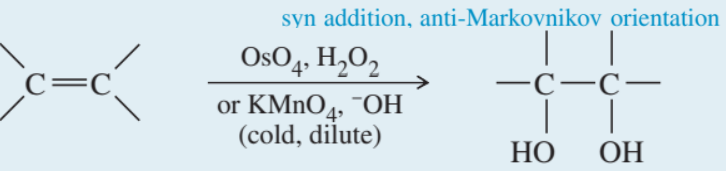
Grignard Reagents

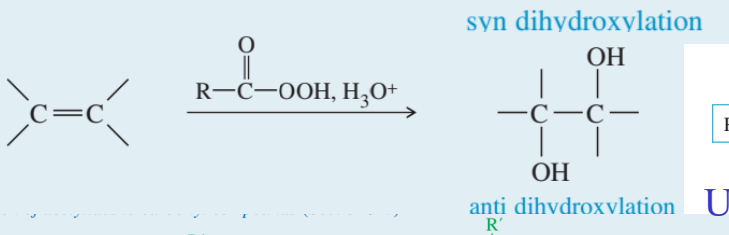


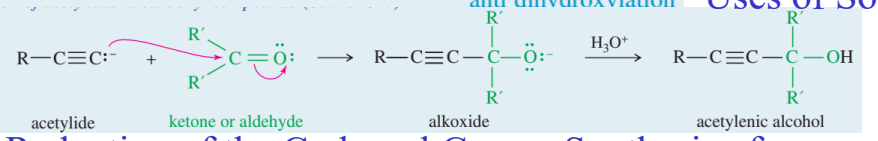
Synthesis of Alcohols: Introduction and Review



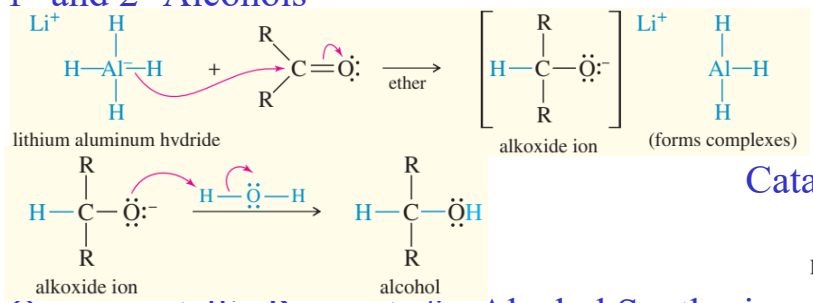




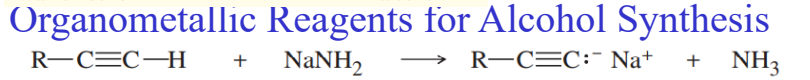




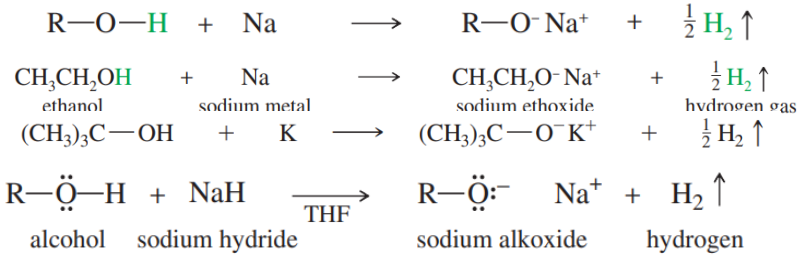
Reduction of the Carbonyl Group: Synthesis of 1° and 2° Alcohols



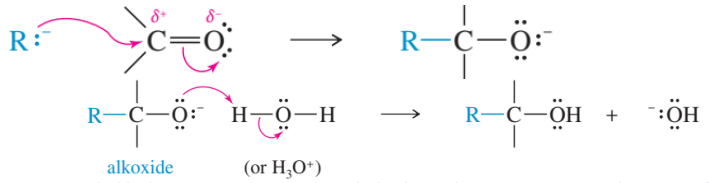
Organometallic Reagents for Alcohol Synthesis



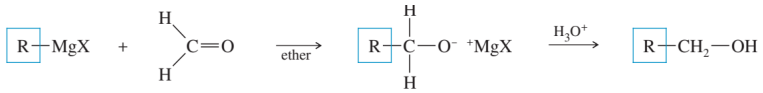
Formation of Sodium and Potassium Alkoxides



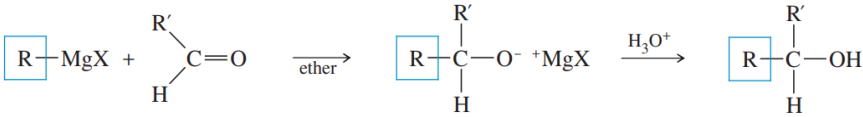
Reactions of Organometallic Compounds



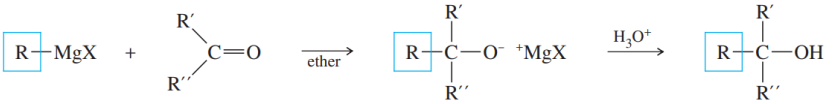
Addition to Formaldehyde: Formation of Primary Alcohols



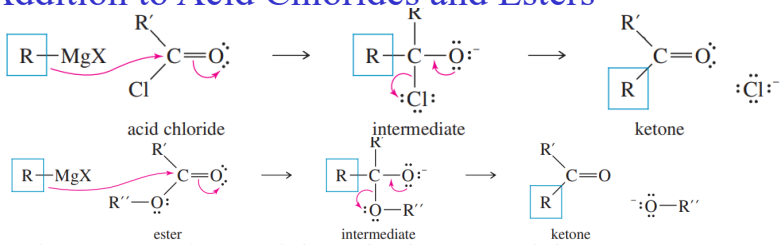
Addition to Aldehydes: Formation of Secondary Alcohols



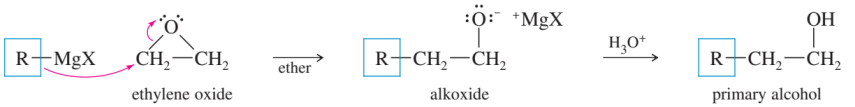
Addition to Ketones: Formation of Tertiary Alcohols



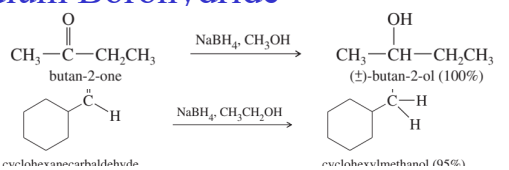
Addition to Acid Chlorides and Esters

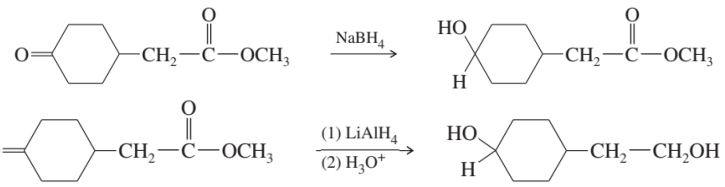


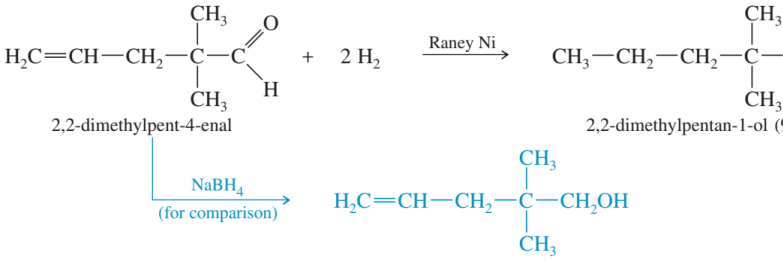
Ring-Opening with Ethylene Oxide



Uses of Sodium Borohydride







Catalytic Hydrogenation of Ketones and Aldehydes
